PROFESSIONAL SUMMARY

I am a senior Product, Growth, and Delivery leader with more than fifteen years of experience in digital business and over eight years building and scaling technology products across FinTech, high-load payment infrastructure, digital transformation, gaming, and AI-enabled products. My career has consistently sat at the intersection of product strategy, technology delivery, operations, and commercial growth, supported by a technical background in mathematical programming and a Master's degree in technological entrepreneurship and innovation.

Over the course of my career, I have led large-scale technology and product operations at organizations including Sber, Redrift, and Samolet, as well as international FinTech ventures. My work has ranged from managing high-load payment systems processing more than 100 million transactions per day to leading multi-product portfolios, scaling technology platforms, and delivering transformation programs with significant commercial impact.

Professional Recognition & Expertise:

- Industry Status:** Member of the Council of the Guild of Marketers of Russia; invited speaker on the commercial application of Augmented and Virtual Reality (AR/VR) technologies.
- Media & Publications:** Served as Business Development Director for ThingLink in Russia; author of expert articles and columns for Rusbase (selected for the weekly editorial list of best columnists), Delovoy Peterburg, and CMS Magazine.
- Thought Leadership:** Author of a series of highly-rated practical articles on Habr (under the alias RomarioBro), examining technology and game-development delivery, project recovery, management systems, and generative AI integration in project management.

PROFESSIONAL EXPERIENCE

That's Gonna Help / Independent Projects | May 2025 – Present

Fractional Delivery Lead & AI Ops Architect

Context: Balancing family responsibilities (Full-time Parenting Career Break) with independent startup consulting, AI/LLM development, and designing Product & Marketing Operations systems.

- AI & LLM Automation:** Develop and implement AI-driven automated workflows (AI agents) for product research, knowledge management, and digital operations, reducing routine team workload by 30%.
- Growth Systems Engineering:** Build comprehensive Product, Growth, and Performance Marketing systems for technology startups: value positioning, acquisition channels, SEO, end-to-end analytics, and operational models aligned with P&L targets.
- Fractional Leadership:** Provide strategic and operational support to international startup teams, driving synergy between technical delivery (delivery) and business-focused product efficiency.

SBER / JSC "RASHeTNYE ReSHeNIYA" (Settlement Solutions) | 2024 – 2025

Project Lead — Transportation Payment Processing

Context: Sberbank Group / Settlement Solutions (JSC "Raschetnye Resheniya") is the largest bank in Russia and a leading FinTech ecosystem. Developed a high-load transit payment processing system covering 40 regions and processing over 100 million transactions per day, serving ~40 million users. The platform includes core processing, pre-processing, and operator management systems.

- **Cross-functional Management:** Led a core team of 40+ specialists and coordinated collaboration between Product, Engineering, QA, Architecture, DevOps, Support, external partners, and regulators (managing ~12 teams, 10–15 internal and 10 external systems in total).
- **End-to-End Delivery:** Managed the complete product lifecycle from business requirements gathering and backlog prioritization to roadmap development, engineering, testing, production release, and scaling.
- **High Reliability & Release Management:** Organized and successfully executed 14 major production releases under strict compliance requirements, increasing the on-time release delivery rate from 20% to 70%.
- **Product Development:** Designed and implemented 8 product features, improving transaction speed and user experience for millions of commuters.
- **Infrastructure Efficiency:** Optimized operational workflows, improving the overall efficiency of the division by 2–10% and laying the groundwork for lower transaction processing costs.

REDRIFT | 2021 – 2023

Head of PMO / Product Delivery

Context: Redrift is an American (US) full-cycle game development studio. Led an international portfolio of B2C web/mobile products and managed the Product Delivery system from ideation and MVP to global launch, growth, and LiveOps, with an annual development budget of over \$3 million.

- **Portfolio Management:** Directed Product Operations and Portfolio Operations for 10+ products and strategic initiatives in a company of 150+ specialists, coordinating development across cross-functional teams ranging from 3 to 60 members.
- **Management & Alignment:** Directly managed 10+ Project/Product Managers; aligned business operations and delivery processes between Product, Engineering, Design, QA, Analytics, Marketing, and Operations.
- **PMO Process Optimization:** Implemented a digital dashboard system for real-time monitoring of backlogs, resources, epics, sprints, and workload distribution, improving PMO delivery efficiency from 60% to 95% (delivering 95% of projects on time).
- **Speed to Market:** Accelerated the launch of key portfolio products from concept to international release in tight timeframes (8–10 months).
- **AI Integration:** Integrated generative AI tools (ChatGPT OpenAI API, Stable Diffusion, Midjourney) into product and creative workflows, significantly reducing content production time and cost.

INTERNATIONAL FINTECH PROJECT (ChatEx) | 2020 – 2021

Head of Product Projects | Product & Growth Operations

Context: ChatEx was a leading international mobile P2P platform and crypto-neobank (Telegram bot, mobile apps, web portal) combining wallet, P2P trading, and investment deposit services.

- **Product Scaling:** Scaled the registered user base from 30K to 300K and MAU from 1K to 10K (10× MAU growth) by deeply integrating product improvements, analytics, and operational support.
- **Product Release Management:** Led 3 major product releases spanning 400+ screens, 70 user scenarios, and over 2,000+ test cases, executing exactly on schedule and within budget.
- **Quality & Customer Satisfaction:** Achieved a 4.6 Google Play store rating (based on 500+ reviews) by refining QA processes and establishing regular Customer Development feedback loops.

- **Analytics & Hypotheses:** Implemented and configured end-to-end product analytics using Firebase, Amplitude, AppsFlyer, and AppMetrica to enable rapid testing of product and marketing hypotheses.
- **Organic Growth:** Drove a 4× increase in organic traffic over 8 months through a focused SEO project and a 2× increase in website conversion rates.

SAMOLET | 2019 – 2020

Digital Transformation Project Lead | Marketing & Commercial Operations

Context: Samolet Group is the largest PropTech company and leading real estate developer in Russia. Managed the digital transformation of the marketing and commercial units prior to the company's IPO, covering 10 departments and over 500 users.

- **P&L Alignment & Business Impact:** Aligned digital initiatives of 10 commercial departments with P&L financial models, business cases, and investment committee approvals. Delivered a project portfolio with a confirmed economic impact of ₹950 million in 2019 and structured a portfolio with a projected impact of ₹1.5 billion for 2020.
- **Marketing Efficiency:** Optimized media planning, built end-to-end Tableau dashboards, and restructured agency collaboration, boosting marketing performance by 15–25%, raising ad traffic efficiency by +9%, and reducing acquisition cost (DRR) by 15%.
- **Collaboration Infrastructure:** Implemented Jira and Confluence from scratch for 500 commercial users, establishing complete workflow transparency and closing over 10,000+ tasks in 9 months.
- **Organizational Transformation:** Co-led a marketing transformation project with McKinsey as Agile Coach and Scrum Master, improving departmental operational efficiency by 2–10%.

INTERNATIONAL DIGITAL FINANCE PROJECT (Gamblica) | 2018 – 2019

Product / PMO / Operations Lead

Context: Gamblica was an international digital finance Web3 startup that developed a blockchain-based gaming and betting platform.

- **Fundraising & MVP:** Coordinated product strategy, MVP development, roadmap, and CJM, contributing to raising over \$3 million in external funding through an ICO.
- **Growth & Operations:** Built the operational lifecycle funnel (Acquisition, Activation, Engagement, Retention), achieving traffic-to-registration conversions of 2–4%, a 150% ROI on token purchases, and attracting over 480+ active token holders.
- **Team Coordination:** Coordinated developers and marketers within a cross-functional matrix structure, managing sprint planning and KPI tracking.

SIMDAQ | 2018

Product Manager

Context: SIMDAQ was an international FinTech startup that created a trading simulator on historical data for trader education, raising \$5 million in venture funding.

- **Product Launch:** Designed the product concept, roadmap, and MVP from scratch, helping secure \$5 million in venture funding.
- **Product Design:** Created product requirements and wireframes for 30+ core screens (dashboard, simulator, personal cabinet).
- **Team & Customer Development:** Recruited and led a cross-functional team of 15+ specialists, conducting continuous Customer Development and hypothesis validation.

DIGITAL PRODUCT & GROWTH (Early Career) | 2006 – 2018

Digital Marketing / Web & Mobile Development Lead

Context: 12-year track record in web development, digital marketing, and lead generation. Founded Topmark, a digital agency ranked among the Top-100 web studios in Russia (Tagline) and Top-50 in St. Petersburg (CMS Magazine).

- **Project Management:** Managed the full development and search engine optimization (SEO) lifecycle of over 300 web and mobile projects across B2B and B2C sectors.
- **Marketing Expertise:** Built in-house teams and directed external agencies in SEO, PPC (Google Ads, Yandex.Direct), media buying, email marketing, and web analytics.
- **Transition to Product:** This intensive commercial background provided a solid foundation in customer acquisition (CAC), product economics (LTV, ROI), and user distribution, serving as a launchpad for professional Product and Operations leadership.
